Expected to graduate in 2026, I am seeking a 9 to 12-week Software Engineering internship starting in May 2025

Summary

Keen on new technologies and computer programming since I was young, my ambition is to become a Software Engineer. Currently in my second year of the M.Sc. in Engineering program in France, I have created real-world projects, including showcase websites, e-commerce websites or online games, showcasing my ability to create large-scale and impactful projects. Passionate, hardworking, and a strong team player, I am committed to delivering high-quality solutions that make a difference.

Education

IMT Atlantique (Mines-Telecom), France 2023 – Present
MSc in Engineering major: Software Engineering of Distributed Systems

Paris Institute of Technology, France 2021 – 2023
BSc in Computer Science major: Deployment of communicating and secure applications GPA: 5/5

Work Experience

Software Engineer, Renault Group (France) 2023 – Present
Apprenticeship

- Developed multiple full-stack web applications for industrial process optimization.
- Led a key project-management app generating €630k annual savings across Renault's French plants.
- Set up CI/CD pipelines to automate the deployment of our applications.
- Operated in agile mode (Scrum).
- Tech Stack : Next.js, TypeScript, Symfony (PHP), MySQL, Playwright.

Software Engineer, Ministry of Armed Forces (France) 2022 – 2023
Apprenticeship

- Developed and maintained a data visualization web application using React.js and Java.
- Conceived complex new features to increase the efficiency of the company.
- Introduced a gamification module that doubled the number of users in 6 months.
- Tech Stack : React.js, TypeScript, Java, Spring, MySQL, Elasticsearch, Microservices architecture.

Event Participation

'24h of code' (hackathon) April 2024
Participant

- Collaborated to create an interactive AI-powered adaptation of the game 'Werewolf'.
- Integrated AI capabilities to simulate human-like player interactions.
- Won first place at the event.
- Tech Stack : React.js, Three.js, Python, Mistral AI

Skills

- **Languages:** English, Fluent (C1 EF Set Certificate in English); French, Native; Spanish, Basic knowledge
- **Technical Skills:** Data Structures, Design Principles, React.js, Next.js, Three.js, Java, Python, JavaScript, TypeScript, Symfony (PHP), C, MySQL, MongoDB, Elasticsearch, Git, Docker, AWS, Playwright
- **Soft Skills:** Adaptability, Organization, Leadership, Teamwork, Problem Solving

Hobbies & Interests

- Hackathons, playing tennis, vice-president of school's aid organization
