

Jordan BAUMARD

Brest, France | +33 7 81 33 47 62 | jordanbmr@gmail.com

Expected to graduate in 2026 and seeking for a 13-week internship (April-August 2025) in Software Engineering

Summary

Keen on new technologies and computer programming since I was young, my ambition is to become a Software Engineer. Currently in my first year of Computer Science engineer's degree at the IMT Atlantique based in Brest (FR), I have already made a few projects such as online games, showcase websites, and e-commerce platforms. I have proven my ability to create large-scale applications that have a positive impact.

Education

IMT Atlantique (Mines-Telecom), FR 2023 – Present
Engineer's degree (MS) major: Networks and telecommunications

Paris Institute of Technology, FR 2021 – 2023
B.S. in Computer Science major: Deployment of communicating and secure applications

Work Experience

Software Engineer, Renault Group (FR) 2023 – Present
Apprenticeship

- Digital transformation of processes at the Le Mans plant.
- Web server configuration and setup using Nginx, Docker.
- Set up CI/CD pipelines to automate the deployment of our applications.
- Operated in agile mode (Scrum).

Junior Software Engineer, Ministry of Armed Forces (FR) 2022 – 2023
Apprenticeship

- Developed and maintained a full-stack application using ReactJS and Java.
- Conceived complex new features to increase the efficiency of the company.
- Fixed and solved existing bugs.
- Introduced a gamification module that doubled the number of users in only 6 months.
- Collaborated with cross-functional teams to achieve project goals.

Event Participation

'24h of code' (hackathon) April 2024
Participant

- Collaborated to create an interactive AI-powered adaptation of the game 'Werewolf'.
- Integrated AI capabilities to simulate human-like player interactions.
- Won first place at the event.

Skills

- **Languages:** English, Fluent (C1 EF Set Certificate in English); French, Native; Spanish, Basic knowledge
- **Technical Skills:** Data Structures, Design Principles, Java, Python, NodeJS, Javascript (TS), ReactJS, C, PHP, MySQL, MongoDB, Elasticsearch, Git, Docker
- **Soft Skills:** Adaptability, Organization, Leadership, Teamwork, Problem Solving

Hobbies & Interests

- Hackathons, playing tennis (10 years), volunteering for aid organizations
